AMENDMENT

Dear Sir:

In response to the Official Action mailed August 11, 2005, please amend the following claims as follows:

1. (Currently amended) A wireless communication system for sending one or more addresses to a global positioning system device ~~via a connector from an address file storing a plurality of addresses in a computer a device which stores addresses,~~ comprising:

means for selecting one or more stored addresses from the address file a ~~device with addresses stored thereon;~~

means for transmitting ~~via a connector~~ said selected one or more addresses to a global positioning system device; and

means for populating the address fields in the global positioning system device with the transmitted address.

2. (Currently amended) The wireless communication system of claim 1 wherein the address file ~~device with addresses stored thereon~~ is a personal digital assistant address book.
3. (Currently amended) The wireless communication system of claim 1 wherein the address file ~~device with addresses stored thereon~~ is a cellular phone address book.
4. (Currently amended) The wireless communication system of claim 1 wherein the address file ~~device with addresses stored thereon~~ is a laptop computer address book.
5. (Original) The wireless communication system of claim 1 wherein the connector for transmitting the addresses to a global positioning system device is Bluetooth.
6. (Original) The wireless communication system of claim 1 wherein the connector for transmitting the addresses to a global positioning system device is infrared.
7. (Currently amended) A wireless communication method for sending one or more addresses to a global positioning system device ~~via a connector from an address file storing a plurality of addresses in a computer a device which stores addresses,~~ comprising the steps of:
